# The pathway platform

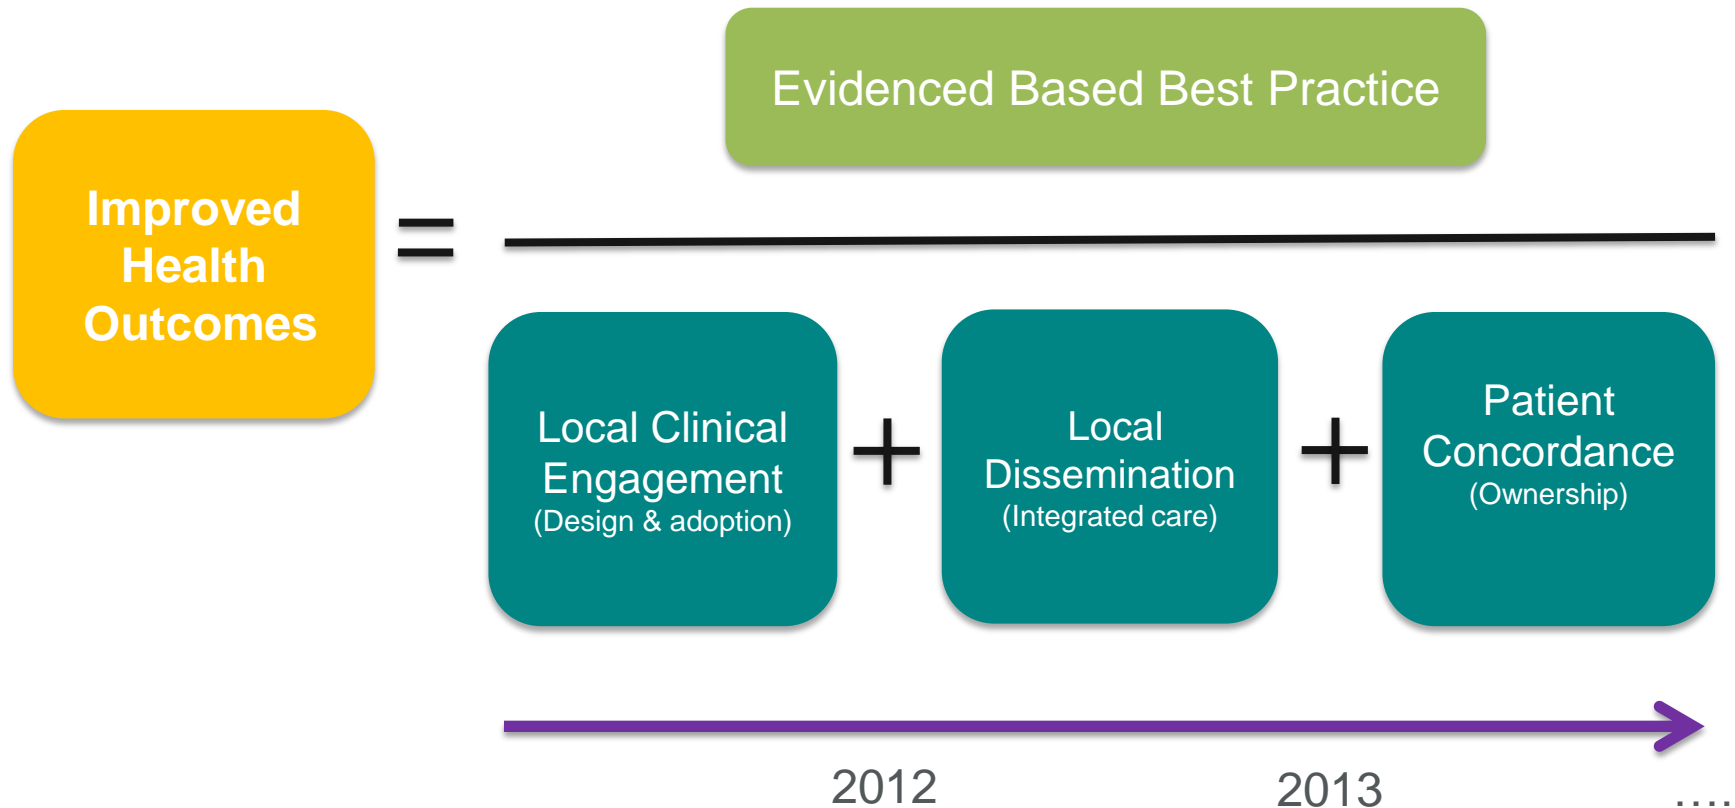

Point of care  
Evidence-based,  
Practice-informed,  
Customisable  
Pathways & Referrals  
guidance

Accessed by c.50,000  
HCPs and 300,000  
citizens

200 clinicians join the Map each week.  
+1500 Local Pathways added

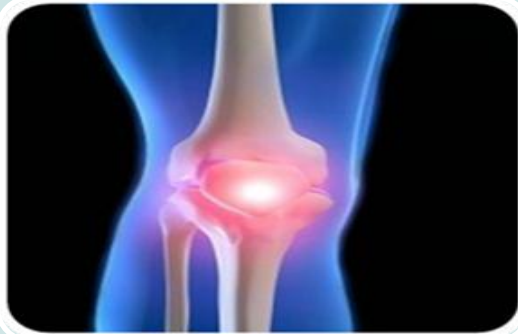

# From our experience in local care transformation...

# The evolving care loop

# Local innovation in action

## Working across care settings

**NHS Southampton City, NHS Hampshire and University**

Hospital NHS FT have developed over 110 pathways together, improving communication across care settings, managing patients more effectively, reducing variation and providing care in the most appropriate setting

## Improving patient outcomes

**NHS North Yorkshire & York**

Created new pathways for COPD and CHF to underpin their telehealth programme, including secondary care, community teams and other stakeholders.  
Achieved 61% reduction inpatient episodes; 45% reduction outpatient appointments.

## Increasing transparency

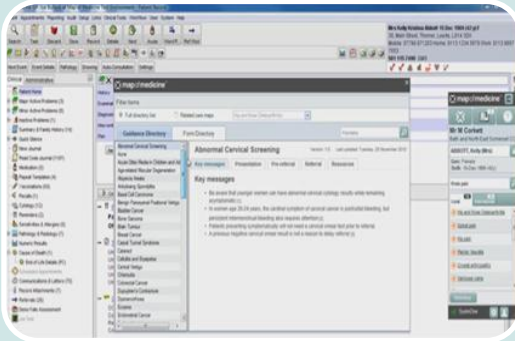

**Facilitating dialogue between GP and patient**

“I can work through pathways with patients and methodically manage their issue – often without making a referral” GP, W Hampshire  
“Patients are encouraged to go through the Map pages for their condition...If patients want to know whether the GP has offered them the appropriate tests, why shouldn't they have the chance to do this?” GP NHS North West

# Seeding integrated care

# Integration in action

## Electronic referrals

Sarum Group of Wiltshire CCG

In a pilot project, they created seven local clinical pathways and local referral form templates

were configured and linked to pathways and local patient leaflets.

Results included significantly reduced time spent in referrals process for both clinicians and admin staff

## Including social care information

Worcestershire Acute Hospitals NHS Trust

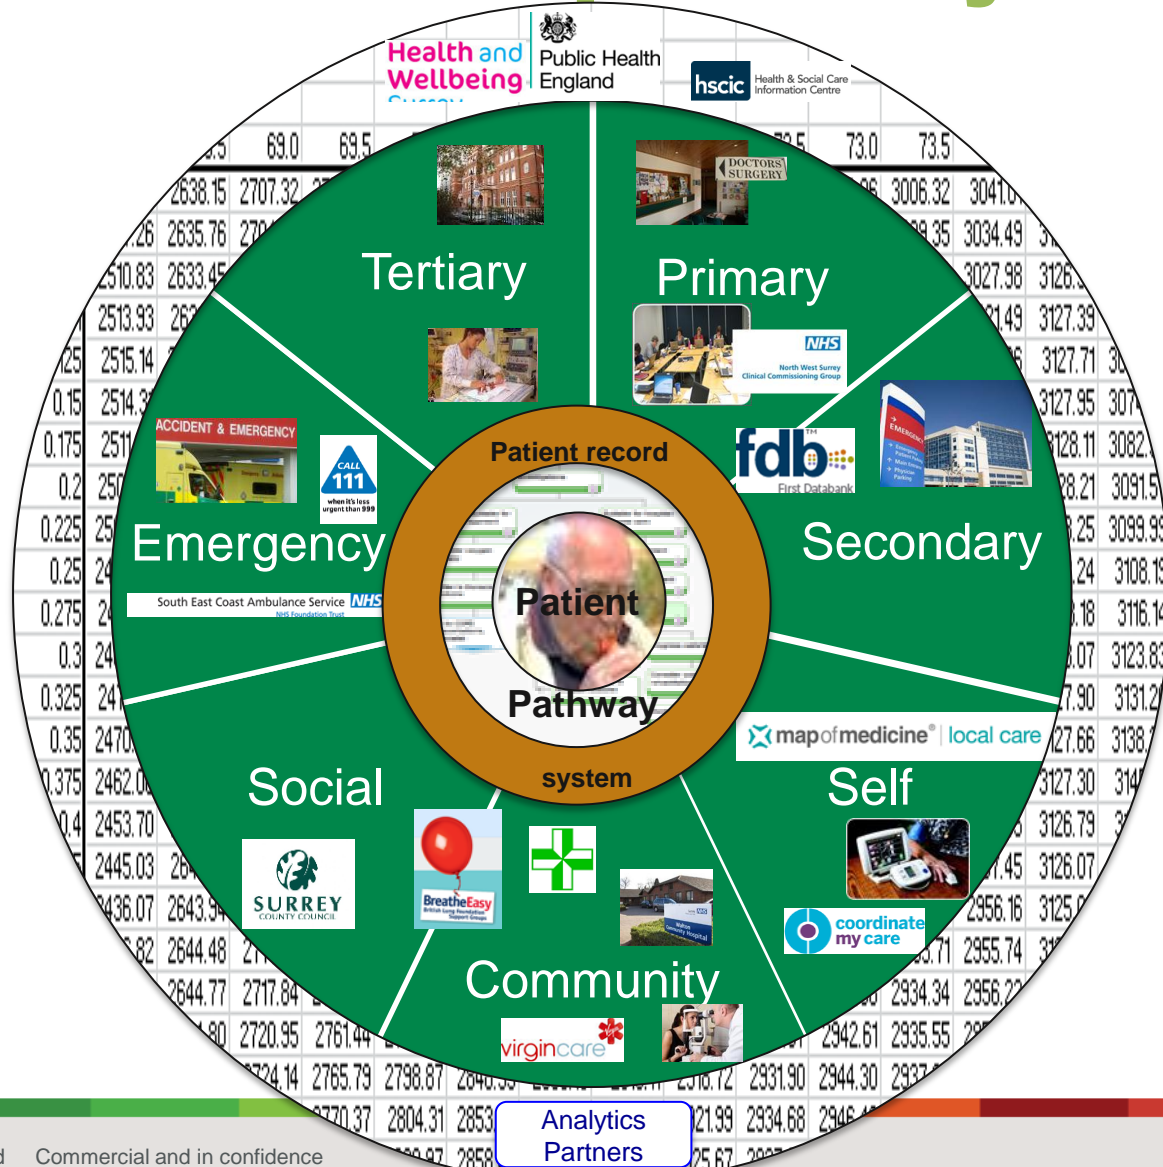

Created an End of life pathway to include information on local discharge teams, referral teams, local care homes, opening hours. Ensures appropriate staff planning and caring for patients approaching the terminal phase of their illness

## Cross care setting

NHS Berkshire East and West

In partnership with the Diabetes Centre, Royal Berkshire Hospital and the Diabetes Stakeholder Network and Diabetes Sans Frontiers, Map of Medicine have facilitated the creation of a 4-tier approach to diabetes management in primary, secondary and community care settings

# A vision for interoperability

A decorative header bar at the top of the page consists of a series of colored squares in shades of green, yellow, orange, and red. A thin teal vertical line extends from the center of this bar down to a small teal dot positioned above the text.

**Thank You**
